Career & Technical Education Courses Offered to Lackawanna High School Students

An Animated Future

Paul Sulpizio is a senior from Lackawanna High School and is enrolled in the Digital Media program at Erie 1 BOCES Career and Technical Education Center at Calspan Business Park.

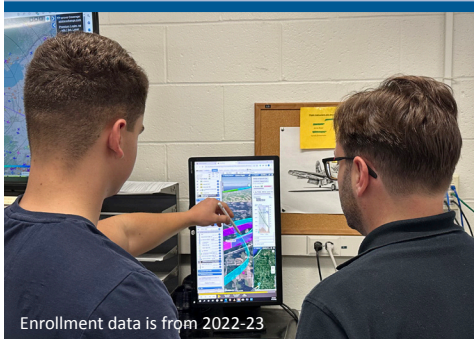

"I enrolled in BOCES because I've been interested in learning more about art and just starting animation in general," Paul said.

Digital Media students create amazing graphics, stunning video and eye-popping animation alongside industry professionals. They develop design skills for digital screens and print layouts, YouTube videos, photography and animation. They also learn to operate software and hardware used by today's digital media workforce.

"This program has provided me an advantage to reach my goals by teaching me animation so far," said Paul. "Safe to say, learning and experiencing new things here is actually fun, thanks to Mr. Bieger and Mr. Killion. They have probably been some of, if not the most understanding teachers I have come across."

In the fall of 2024, following graduation, Paul is not sure what area he wants to pursue. "Something in the field of art or commissions," he said. "From what I've heard, animation commissions usually rank higher in terms of commissioning."

As part of public education, Erie 1 BOCES offers a variety of career and technical programs during the regular school day to high school students in Erie County. High school students interested in learning more about how they can participate in various programs, such as digital media, web and gaming technologies, electronics and computer technology, culinary arts, welding, education, health careers or zoo wildlife and conservation, should visit www.e1b.org/cte or speak with their high school counselor.
